

# What to Do With Beverage Containers in Deposit States During Coronavirus

**BEST OPTION**

**If...**

...your local redemption center is still operating

**Then...**

...take it to your local redemption center to get your money

**OTHER OPTIONS**

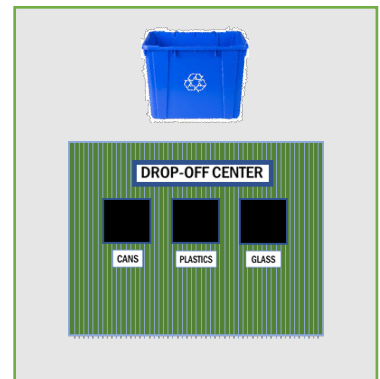

...your local redemption center is no longer operating and there isn't another one nearby

...consider holding onto as many beverage containers as you can for later redemption once the local redemption centers become available again

**OR**

...put your beverage container in your curbside bin or take it to a drop-off center

## Why bother returning containers to be recycled?

1. It's real money that is owed to you and can add up.
2. Recycling beverage containers is good for the environment.
3. Manufacturers NEED that material to make more of the packaging people NEED during this crisis.
